## AMENDMENTS

## In The Claims

- 1. (Original) A cutting device comprising:
  - a base having an opening with cutting edges; and
- a flap articulated with respect to the base, the flap having a shape corresponding to the opening and cutting edges corresponding to the cutting edges of the opening.
- 2. (Original) The device according to Claim 1, wherein the base has a guide edge.
- 3. (Original) \ The device according Claim 1, wherein the base is mounted on a card.
- 4. (Original) The device according to Claim 3, wherein the card supports a medical device system.
- 5. (Original) The device according to Claim 4, wherein the medical device system is for delivering a foam material.
- 6. (Original) The device according to Claim 1, wherein the base has a plurality of openings with cutting edges.
- 7. (Original) The device according to Claim 6, wherein the flap has a plurality of rails for cutting a plurality of strips.
- 8. (Original) The device according to Claim 7, wherein each of the rails has a ridge which forms a crease in the strips.
- 9. (Original) The device according to Claim 1, wherein the flap has a ridge.
- 10. (Original) The device according to Claim 1, wherein the shape of the flap is a polygon.
- 11. (Original) A cutting device complising:
  a base having an opening with cutting edges;

a flap articulated with respect to the base, the flap having a shape corresponding to the opening and cutting edges corresponding to the cutting edges of the opening; and

- 12. (Original) The device according to Claim 11, wherein the base has a guide edge.
- 13. (Original) The device according to Claim 11, wherein the medical device system if for delivering a foam material.
- 14. (Original) The device according to Claim 11, wherein the base has a plurality of openings with cutting edges.
- 15. (Original) The device according to Claim 14, wherein the flap has a plurality of rails for cutting a plurality of strips.
- 16. (Original) The device according to Claim 15, wherein each of the rails has a ridge which forms a crease in the strips.
- 17. (Original) The device according to Claim 11, wherein the shape of the flap is a polygon.
